

DEKUPS[®]
Disposable Cups

FLUID HANDLING

Productivity.
Performance.
Profits.

Increase Productivity and Efficiency

Less Cleaning - Only clean gun fluid passage vs. traditional gravity cups that require significant cleaning time and solvent use

Reduces Steps - Mix and spray with one cup. Multiple filter options reduce the need to strain paint

Clean Paint Jobs - Sealed, contamination-free system

Coatings - Works with a wide variety of coatings

Safety - Less exposure to cleaning solvents and VOC's

Storage - Temporarily store unused paint between coatings therefore reducing paint waste

HOW DOES IT WORK?

ASSEMBLY

Disc strainer for waterborne coatings

Barrel filter not required when using the disc strainer

SHAKING

Designed for Durability and Performance

Liner Collapses Evenly

Liner system provides superior fluid flow, color match, and less over mixing. Spray at any angle including upside down.

Multiple Filter Options

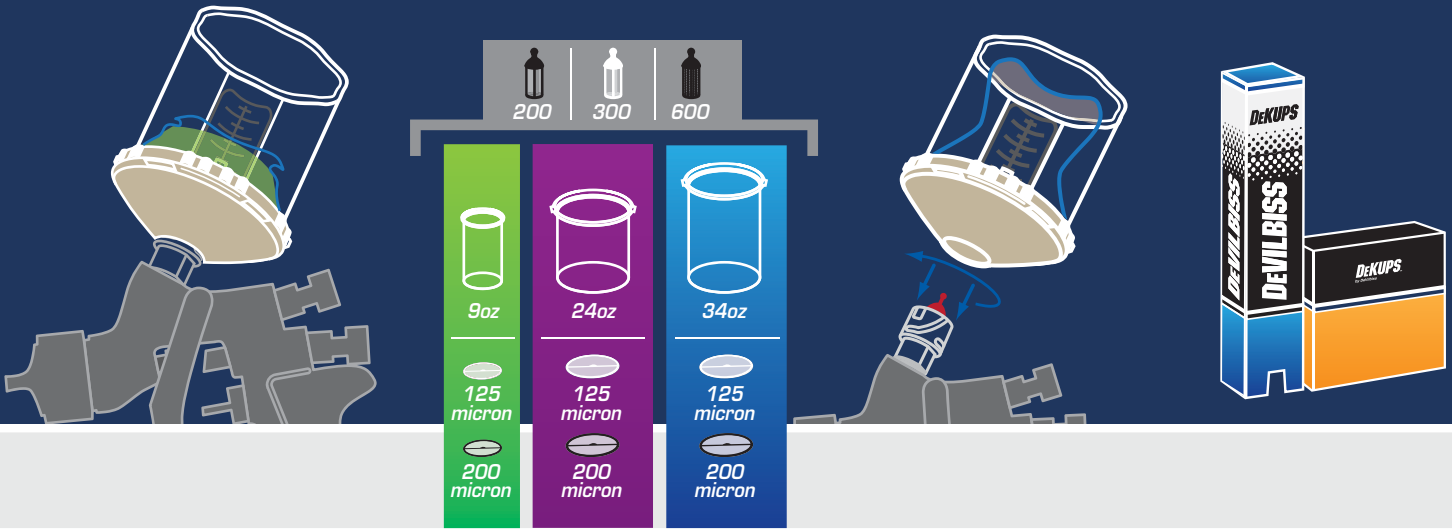

Choose the right filter for your job. Barrel filters offer additional savings, while disk filters provide sizable filtration for superior fluid flow of waterborne paints.

Positive Locking Connection

Non-threaded easy on and off design allows for a tight and secure connection. Adapters available for virtually all guns.

Self-Dispensing Packaging

Mount. Dispense. Discard. Conveniently packaged for production shops.

REFILLS

If using a barrel filter

If using a disk filter
